

Trumpet/Trombone Doubling Instructions*

In the first two staves you will find the proper fingering and slide position for each of the instruments.

Trumpet in B \flat	0	1-3	1-2	1	0	1-2	2	0
Trombone	1	6	4	3	0	4	2	1

The biggest problem when learning to double on trombone is learning the positions from a bass clef score. So first change the trombone bass clef to a treble clef which you already know.

B \flat Tpt.	0	1-3	1-2	1	0	1-2	2	0
Tbn.	1	6	4	3	0	4	2	1

*These instructions are used to convert trumpet parts to be played on trombone and do nothing for reading bass clef trombone parts on trombone
