

## Lesson 2

Step 1- Change to scroll view

Select arrow and open "view" just under Grace 1 and change from page view to scroll view

Step 2- Divide first line into two parts

Select arrow and click between the sharp and the time signature to high light the first line

Step 3- Separate the two parts

Click and hold on "utilities" on top row then scroll down to "explode music" and release

Prompt should read "2" then click OK

Step 4- Repeat with the Bass line

Step 5- Delete the original treble (violin) and bass (cello) lines

Select arrow and click on the treble clef sign in the second column, just below the arrow sign

Click on the small box just to the left of the treble clef sign

Right click on the box and choose delete stave to remove that stave

Repeat the same on the bass clef (Cello) line

Step 6- Move staves up on page

Select arrow, click again on treble clef sign to highlight box to the left of the treble clef (first stave)

Click *repeatedly* until the first stave is selected on both pages

Click, hold and drag box up so that the first stave moves to a comfortable location on all pages

Step 7- Assign instruments to each line

Select arrow and under “Window” at the top, select “Scoremanager”

Under “instrument”, first line (unknown), Click in first box.

Under “Blank Staff”, select “Brass”

Under “Smartmusic SoftSyn”, select “Trumpet in C”

On the same line to the left, it should read “Trumpet in C”

Click the arrow just to the right of “Trumpet in C” and select “Trumpet in Bb” Notice that under the label “Sound” it has changed from Piano to Trumpet which you want.

**I HAVE NO IDEA WHY THIS HAPPENS BUT THIS IS THE ONLY WORK-AROUND I HAVE BEEN ABLE TO FIND.**

Repeat the same steps for the other three instruments. I would suggest you choose 2 trumpets and 2 trombones at this time but it is your choice.

At this point, you will be able to select the play arrow at the top and hear 2 trumpets and 2 trombones. If you hear a piano, you need to go back to Step 7 and change the problem instrument as you did with the trumpet. If Piano is listed on the right, reassign it to the instrument you want to sound.

That completes Lesson 2

Check back in a couple days for the next Lesson.
